Welcome to: NCEA Level Two Digital Technologies (L2DGT)

Kaua e rangiruatia te hāpai o te hoe; e kore tō tātou waka e ū ki uta.

Do not lift the paddle out of unison; our canoe will never reach the shore.

Big ideas of Digital Technologies that ākonga will cover

- **The discipline of Digital Technologies embodies whanaungatanga. Outcomes are made by people, for people, within cultural, social, and environmental contexts**
- **Digital outcomes are created for a purpose by following established processes**
- **The discipline of Digital Technologies embodies auahatanga. Outcomes solve problems and enhance and expand human possibilities**
- **All digital technologies are underpinned by algorithms and computer science principles**

Course Information:

This course covers the revised Digital Technologies Curriculum introduced over 2018/2019, when existing expiring standards were phased out. The new standards are intended to reflect the realities of the ever-changing work-place environment and the role that Digital Technologies increasingly plays in career paths. One skill that is being developed across the board is the ability to think through implications as outcomes are designed and implemented. This involved 'thinking through' what could happen and why before proceeding down a path on a particular course of action. The standards currently offered are geared towards making a smooth transition to the new standards when they are ready to be rolled out by the Ministry of Education in the coming years. This course aims to help ākonga to become informed users, and innovative creators, of technology within a digital environment. Ākonga will be given the opportunity to work as a team on a project using Agile methods and sprints.

SPECIAL NOTE: *Students will be required to work on a BYOD laptop capable of running Adobe Creative Cloud (additional cost if required) and Microsoft Office 365 software for which student licenses will be available as part of the course fee. Depending on the project a student chooses to do, the device will also need to be capable of running Visual Studio Code and/or a game engine of the students' choosing.*

This course consists of:

There are a total of 25 credits available at Level 2 Digital Technologies, depending on chosen stream.

Some standards run concurrently

Please note:

This course does not offer reassessment opportunities

Single assessment opportunities only are available for all internal Achievement Standards offered.

Topics to be covered in this course are:

- Produce a Digital Technology Outcome (Mobile App)
- Produce a Digital Media Outcome (Website)
- Planning and developing a digital technologies outcome using agile processes

Assessment:

Each unit will be assessed through assignments as required by each NCEA Standard. There will not be a mid-year exam, although students will have the opportunity to complete assignment work during this time. An end-year external DCAT exam will take place. Assessments will cover course content, personal application and reflection.

Assessment Policy:

Please see the **NCEA student guide – 2026** for all assessment matters related to the following:

- Assessment Policy
- Hand in of assignments
- Extensions
- Absences
- Authenticity
- Appeal Process

Homework:

- assignment /portfolio work
- research

Essential Equipment:

School computers are no longer available during allocated periods, except for emergency purposes should a student laptop malfunction. If you are working on files on a laptop or other device, it is essential to have created cloud backups and to ensure that you have the latest version available during class sessions. All students must have earphones available for listening to tutorials as available during class.

NCEA standards offered:

AS Number	Version Number	Standard Title	Internal or External	Credits
AS 91893	**1**	Use advanced techniques to develop a digital media outcome (website or video)	Internal	**4**
AS 91890	**1**	Conduct an inquiry to propose a digital technologies outcome	Internal	**6**
AS 91891	**1**	Apply conventions to develop a design for a digital technologies outcome	Internal	**3**
		OR		
AS91896	**1**	Use advanced programming techniques to develop a computer program	Internal	**6**
		OR		
AS91357	**3**	Undertake effective development to make and trial a prototype (*Please note, HMT also offers this course. Subject to HOF approval*)	Internal	**6**
AS91897	**2**	Use advanced processes to develop a digital technologies outcome (Project Management)	Internal	**6**
AS91899	**1**	Present a summary of developing a digital outcome	External	**3**
			TOTAL	**22 or 25**

General:

Digital Technologies is an exciting field of growth in terms of both industry developments, as well as huge potential in the job market. How much you get out of this course will have a lot to do with how much you put in. This course requires a high degree of personal discipline with time management and planning in order for you to meet your academic goals. I will help in any way I can to make your year a success.

With best wishes for a great year of learning.

Mr Lier

TIC Digital Technologies

Timeline and Assessment Schedule

Week	Term 1	Term 2	Term 3	Term 4
1		AS91890 - Conduct an inquiry to propose a digital technologies outcome	AS91897 & AS 91891/AS91896 - Project management with either programming or design	Yr11-13 Mock Exam week
2	AS 91893 - Develop a digital media outcome			
3				
4				Yr 10 & NCEA Tutoring week
5				NCEA Exams
6			AS91899 - External preparation	NCEA Exams
7		AS91897& AS91891/AS91896		NCEA Exams finish
8				
9			AS91899 - External	
10				
11	AS91890
