KingsWay Senior School
Course Outline 2026

Welcome to: KWS Year 11 Digital Technologies (11DGT)

Kaua e rangiruatia te hāpai o te hoe; e kore tō tātou waka e ū ki uta.

Do not lift the paddle out of unison; our canoe will never reach the shore.

Big ideas of Digital Technologies that ākonga will cover

- **The discipline of Digital Technologies embodies whanaungatanga. Outcomes are made by people, for people, within cultural, social, and environmental contexts**
- **Digital outcomes are created for a purpose by following established processes**
- **The discipline of Digital Technologies embodies auahatanga. Outcomes solve problems and enhance and expand human possibilities**
- **All digital technologies are underpinned by algorithms and computer science principles**

Course Information:

This course covers Year 11 Digital Technologies. One skill that is being developed across the board is the ability to think through implications as outcomes are designed and implemented. This involved 'thinking through' what could happen and why before proceeding down a path on a particular course of action. SPECIAL NOTE: S*tudents will be required to work on a BYOD laptop capable of running Adobe Creative Cloud and Microsoft Office 365 software for which student licenses will be available as part of the course fee. Devices will also need to be capable of running a local IDE (Integrated Development Environment) such as for example Visual Studio Code, Pycharm etc.*

This course consists of:

There are a total of 16 compulsory credits available at Year 11 Digital Technologies

This course does not offer Course Endorsement as an option

Please note:

This course does not offer reassessment opportunities

Single assessment opportunities only are available for all internal courses offered.

Topics to be covered in this course are:

- Produce a Digital Media Outcome (Website/Video)
- Propose a digital outcome
- Produce a Computer Program or computer game (Programming)
- Project management using Agile methods (Iterative development of the computer program)

Assessment:

Each unit will be assessed through assignments as required by each NCEA Standard. There will not be a mid-year exam, although students will have the opportunity to complete assignment work during this time. Assignments will cover course content, personal application and reflection.

Assessment Policy:

Please see the **student guide – 2026** for all assessment matters related to the following:

- Assessment Policy
- Hand in of assignments
- Extensions
- Absences
- Authenticity
- Appeal Process

Homework:

- assignment /portfolio work
- research

Essential Equipment:

School computers are no longer available during allocated periods, except for emergency purposes should a student laptop malfunction. If you are working on files on a laptop or other device, it is essential to have created cloud backups and to ensure that you have the latest version available during class sessions. All students must have earphones available for listening to tutorials as available during class.

NCEA standards offered:

Version Number	Course	Internal or External	Credits
1	Develop a computer program	Internal	4
1	Develop a proposal for a digital outcome	Internal	4
1	Develop a digital media outcome	Internal	4
1	Use Agile project management tools to develop your digital outcome	Internal	4
		TOTAL	**16**

General:

Digital Technologies is an exciting field of growth in terms of both industry developments, as well as huge potential in the job market. How much you get out of this course will have a lot to do with how much you put in. The aim of this course is to introduce you to the Technological Process, as well as give you a taste of a broad range of the areas that Digital Technologies offers: Digital Information; Digital Media; Programming and Computer Science; and Digital Infrastructures. The aim is to expose you to as many aspects of digital technologies as is practicable in order that you have the opportunity to explore areas of interest and discover aptitudes that you may have and which could lead to further study or even avenues of employment in the future.

With best wishes for a great year of learning.

Mr Lier

TIC Digital Technologies

Timeline and Assessment Schedule

Week	Term 1	Term 2	Term 3	Term 4
1		Proposal for a digital outcome	Develop a computer program Agile project management	Yr11-13 Derived Grade Assessment week
2	Develop a digital media outcome Project Management			
3				
4				NCEA Tutoring week Year 10 exams
5				NCEA Exams
6				NCEA Exams
7				NCEA Exams end
8		Develop a computer program Agile project management		
9	Proposal for a digital outcome			
10
